

My 4-Step Moola Vine Income Formula

By Peter Turner

Introduction

This is a simple formula that you just need to read and apply to get serious results with Moola Vine.

Why Moola Vine?

I hand-picked this program to promote to my subscribers and website visitors because it's a 'done-for-you' system that anyone, regardless of their experience, can use to make money online easily. It's perfect if you're a newbie who wants to make a strong start in internet marketing because it doesn't require you to have the skills you normally need to build an online business such as website and list building expertise. Until this launched, you needed to be good at those things before you could make any real money as an internet marketer.

What IS Moola Vine?

It's an automated online business which you can use to line up buyers and get effortless sales without doing any actual selling. This suits most ordinary folk who aren't natural salespeople. It seamlessly harnesses the power of cooperation to build you a customer base – even if you can't build a list, build sales pages or build a relationship with your leads. This was impossible before Moola Vine launched.

How Does it Work?

You refer people to Moola Vine and they buy [Clickbank](#) and/or [JVZoo](#) products from you to activate their ability to earn extra commissions from Green Plan sales. As soon as your referrals have built a downline, it becomes advantageous for them to become eligible for more commissions and this incentivizes your referrals to become buyers and repeat customers. This is a simple method for building an engaged customer base without having products of your own, a website, a list, a

brand or any of the other assets successful marketers have had to struggle to build – until now....

The 4-Step Formula for Making it Work for YOU

Building an unlimited income from Moola Vine only requires that you follow the 4 steps listed here:

1. **Join**
2. **Activate Your Green Plan**
3. **Get as many referrals as you can**
4. **Help Your Referrals to Duplicate these Steps**

Most people join loads of things searching for the elusive easy button without real success because they lack focus and the ability to build a digital sales funnel.

If you follow the above steps properly, you will make money with Moola Vine. When you have some capital to develop your online business further you can either build this income stream bigger or launch your own digital sales funnels – it's up to you.

If you are looking for an easy button – this is without a doubt the easiest button you will find.

You will still need to do stuff though – you **must** take action to get results / speculate to accumulate – whatever you want to call it.

1. OK so step 1 is the easiest – just join [here](#).
2. Step 2 involves activating your Green Plan. This is also very easy. Just log into your Moola Vine account and activate it. You can wait until you have a few referrals before you activate but you might miss out on some Green Plan commissions if you wait.
3. Step 3 requires you to refer other people to Moola Vine. This is easy enough if you go about it the right way. This [page](#) will show you how to get real visitors to your link. Please read it as being unable to generate high-quality traffic is the reason most people fail with most opportunities. They don't know how to determine the difference between real visitors and BS traffic. If you can't promote properly, none of the products and opportunities you promote online will ever work. Most people think it's their product or opportunity that is at fault. In truth, it's just that the product or opportunity isn't being seen by the right people often enough.

4. Activating your Green Plan gives you the ability to message your Moola Vine referrals every day. You can use this ability to promote any products and opportunities you like to them. However, encouraging your referrals to build their Moola Vines and showing them how to get targeted traffic is the best thing you can do with your messages. If you do that, a reasonably high percentage of your referrals will go on to build their own Moola Vines and become your customers. Creating your own customer base gives you the 1 thing that every internet marketer does internet marketing for – **residual income**.

After you have applied the 4-step formula and built an active downline, your Moola Vine will generate a regular online income for you which you can then scale up to whatever level you like by repeating steps 3 and 4.

That's all there is to it.
